

I travel the entire country with my job, and spend a lot of time in a lot of the major cities that are covered by XM's weather and traffic. This is a huge help to me to know of possible traffic or weather problems before I get there. Since I am paying for these services, I don't really see what business it is of the NAB's that they are being provided to me. I seems like that it should be my right to get these services if they are being offered and I am paying for them. So in turn, I believe that it is the FCC's constitutional duty to reject the NAB's petition 04-160 for all of the XM subscribers. Thank you for your time.
